

**IN THE CLAIMS:**

Please amend the claims as follows:

Claims 1-3. (Cancelled)

4. (Currently Amended) In a fluorescence microscope, an arrangement comprising:

blocking filters each having a ~~particular~~ determined wedge angle caused by tolerances of each one of the blocking filters and being used for blocking a portion of the light emitted by a specimen;

wherein said blocking filters are marked with respect to the orientation of their wedge angle.

5. (Previously Presented) The arrangement according to claim 4, wherein said microscope has a filter module, and wherein a marking to which the marking on the filter can be oriented in a defined manner is provided on said filter module.

6. (Previously Presented) The arrangement according to claim 4, wherein the filters are marked with respect to their wedge angle.

7. (Cancelled)
